Re: Korean Patent Application 89-18081
Our Ref: Philip Morris PM-1326
Your Ref: 30775

Dear Mr. Smith:

This is in response to your January 25 letter to Beverly Monroe at Philip Morris.

In the first paragraph of your letter, you pointed to the reference in the specification to the formula Fe_xC for iron carbide where x is between 2 and 3. We believe that this formula properly reflects the scope of iron carbide species which have been experimentally determined.

With respect to the second paragraph of your letter, the specification discloses that the invention applies to any heat sources having the characteristics described in the specification. See p. 6, lines 12-17.

Best regards.

Sincerely,

DLL/EWB:od

Denise L. Loring
Edward W. Boyer
